Summary

Hey there, I'm Daniel, a Full Stack Developer with expertise in React.js, Node.js, and MongoDB. I specialize in crafting captivating user experiences and have a knack for managing extensive projects and budgets. Take a look at my latest project: a chat application that enables seamless conversations with friends or even with ChatGPT. Powered by **#Next.js**, **#TypeScript**, **#UpstashDB** (Redis), and **#TailwindCSS**. If you're seeking a meticulous team player with a keen eye for detail and a passion for building dynamic and immersive user experiences, i'd love to discuss how I can bring value to your team!

Tech Skills

- Experience with **#Vue.js** and **#React.js** using **#TypeScript** to develop MVC Frameworks.
- Strong grasp of server-side programming, API's and REST using **#Express.js | #Nest.js**
- Proficient in modern JavaScript (ES6) and Object-Oriented-Programing
- Familiarity with Git for version control and agile development methodologies
- Knowledge of web accessibility and performance optimization techniques
- Skilled in database management with expertise in **#MySQL** and **#MongoDB**
- Basic understanding of **#CSharp** programming language.

Professional Experience

- **Backend Developer at Sellme (2023-present):** Freelance position utilizing skills in Nestjs, Nodejs, and Javascript to develop efficient and scalable backend solutions. Collaborate with clients to understand their requirements and deliver customized solutions that meet their business needs.
- **Director at Dor-labait (2020-2022)**: Oversaw 90 employees and implemented new policies to improve service quality, resulting in increased customer satisfaction. Managed the budget, ensuring financial stability and growth.
- **Virtual Music Show App (2022-present)**: Developing a virtual space app for music shows using WorkAdventure, tiles software, and JavaScript. Creating an immersive platform for live music performances.

Education

- **Full-Stack Bootcamp at Coding Academy (2022):** Completed a 640-hour intensive program that fully qualified me as a Full-Stack developer, providing hands-on experience with modern web technologies, server-side programming, and database management.
- **M.A in International Relations from University of Haifa (2020-2022):** Specialized in negotiation and decision-making, Honored graduate with a demonstrated ability to analyze complex information and communicate insights effectively.
- **B.S.W in Social Work from The Max Stern Yezreel Valley College (2016-2019):** Gained transferable skills in communication, teamwork, and problem-solving.
