DANIEL SHALEM - Full Stack Developer

054-5882578 | dshctr1993@gmail.com | Github | Linkedin | Portfolio

Dynamic and results-driven full stack developer with 1+ years of experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Passionate about crafting pixel-perfect user interfaces and writing clean, maintainable code. Adept at collaborating with cross-functional teams in agile environments to deliver high-quality products. Excellent analytical and problem-solving skills

Tech Skills

- Proficient in JavaScript (ES6+), TypeScript, Python3, C#, HTML5, CSS3
- Experienced with frontend frameworks like Vue.js, React.js, Angular and Next.js
- Skilled in Node.js, Express.js, Nest.js, Flask, for building RESTful APIs
- Knowledge of machine learning frameworks like TensorFlow and PyTorch
- Familiarity with AWS cloud services (EC2, S3, Lambda, etc.)
- Proficient in version control systems - Git, GitHub
- Knowledge of web accessibility and performance optimization techniques
- Relational databases like MySQL and non-relational databases like MongoDB.

Education

- **2022 - Full-Stack Bootcamp at Coding Academy: Completed** a 640-hour intensive program that fully qualified me as a Full-Stack developer, providing hands-on experience with modern web technologies, server-side programming, and database management.

- **2020-2022 - M.A. in International Relations, University of Haifa (with Honors) -** Graduated top of class with demonstrated ability to analyse complex information and communicate insights effectively.

- **2016-2019 - B.S.W in Social Work from The Max Stern Yezreel Valley College:** Gained transferable skills in communication, teamwork, and problem-solving.

Professional Experience

Backend Developer, Sellme (2023 - Present), https://sellme.space/
- Developed backend APIs using Nest.js, TypeScript, and AWS.
- Implemented API integrations with third-party services.
- Optimized performance and scalability of backend systems.
- Collaborated with clients to understand requirements and deliver solutions.

Full Stack Lecturer, SVCollege (2023 - Present), https://svcollege.co.il/
- Qualified students to become full stack developers, teaching JS, React, Node.js, Express.js MongoDB, and React Native.
- Fully responsible for student success and progression in the program.

Project Lead Developer, Virtual Music Show App (2022 - Present)
- Developing a virtual space app for music shows using WorkAdventure, tiles software, and JavaScript.
- Create an immersive platform for live music performances.
